

Orange County Sanitation District

STATE COLLEGE SEWER CONSTRUCTION

TRAFFIC CONTROL IS RETURNING BETWEEN CERRITOS AVE. AND WINSTON RD. ON STATE COLLEGE BLVD.

The sewer line along State College Blvd. between Orangewood Avenue and Vermont Avenue has been successfully installed. We are now entering the final phase of the project which is connecting the local sewer to the new regional line to avoid service interruption. Connections are being made at various locations in this area.

Traffic control will once again be installed between Winston Road and Cerritos Avenue for the staging of large equipment necessary for this work. This involves k-rail in the center of State College Blvd. All businesses will remain accessible during this time.

December 26th through Spring 2020 (*)

The State College Sewer Construction team thanks you for your patience during construction of this very critical project.

(*) Dates and times are subject to change due to inclement weather.
