Orange County Sanitation District

COVID-19

The Orange County Sanitation District (OCSD) is adhering to all federal, state, and local orders to minimize and reduce the spread of COVID-19.

In an abundance of caution and to safeguard the health and safety of our employees, contractors, and the community, OCSD has responded to the COVID-19 pandemic by implementing the measures below. This is necessary to protect and preserve the public health, and prevent the increasing transmission.

Emergency Response

As the pandemic was declared an emergency, OCSD activated its Emergency Operations Center with the intent to have a team of people monitoring the most recent information, understanding our current situation as an agency, and to ensure we can respond quickly to rapidly changing conditions.

OCSD is a Special District governed by the Health and Safety Code Section 4730.65 and is designated by the U.S. Department of Homeland Security as critical infrastructure and essential service.

Functioning critical infrastructure and critical government services such as wastewater facilities are imperative during the response to the COVID-19 pandemic for both the public health and safety of Orange County and the State of California.
Our personnel are working diligently to make sure OCSD continues to operate with the highest level of service.

**Administrative Operations**

While our facilities continue to operate 24 hours a day / 365 days a year, our administrative offices are currently closed to the public. Our administrative staff is working remotely and available to continue conducting business online and via phone. Contact information for our staff can be found at www.ocsd.com/about-us/contact-us.

Our Board and Committee Meetings will continue and will be held telephonically. Call in details can be found at www.OCSD.com.

**Construction Projects**

Public infrastructure projects, which include sewer improvement projects, are deemed essential activities and will continue during this time. We are making use of the reduced traffic flow to maximize our efforts and accelerate the construction.

Safety measures have been implemented onsite and with our employees, contractors, and visitors to help prevent the spread of COVID-19.
